

**53 | MILLS PHENOLIC PARTITIONS**

Mills Phenolic No-Site Partitions eliminate unpleasant gaps between doors and pilasters for complete privacy. The integral No-Site design is now standard for all Phenolic models. A key feature of the partition system is a rabbeted edge on both the hinge and latch sides of the door. This grooved edge closes off sightlines and provides a flush finish for a European-inspired look. Greenguard Certified as a low-emitting material, phenolic stands up to high usage and wet and humid environments, and is resistant to water, oil, bacteria, and graffiti.

**54 | INTELLI-FLUSH**

The Intelli-Flush Automated Flushing System is a hands-free system that is compatible with existing Flushmate pressure-assisted toilets (1.0, 1.28, and 1.6 gpf models). Ideal for commercial and residential applications, the system reduces the spread of bacteria, dismisses recurring odors, and ensures a hands-free flush, according to the maker. It can be programmed to use hand wave actuation and

an optional 24-hour maintenance flush.

**55 | ASSE-1070-COMPLIANT FAUCETS**

Sloan offers ASSE-1070-compliant faucets with its Optimix anti-scald technology. When cold water is running low, faucets may dispense unsafe hot water. Sloan's in-spout Optimix technology works to prevent scalding in the event of cold water failure. The faucets feature an integrated thermostatic mixing valve on the side of the faucet body to easily set the water to a desired temperature. The valve's lever can be removed for facilities where tamper resistance is required.

**56 | HYDRO-X POWER** EDITORS' PICK

Zurn's touchless sensor faucets are now fitted with its Hydro-X Power technology, a turbine system that generates and stores energy from the flowing water to power the faucet. It only takes a few activations a day to harvest enough power to extend the battery life by at least 10 years, reducing maintenance and replacement costs.

**ZURN** | CIRCLE NO. 855

EDITORS' PICK **57 | EVOLVE CUBICLES**

Engineered for standard use and heavy traffic buildings, including airports, arenas, schools, and shopping centers, Bobrick's Evolve Cubicles offer the look and performance of high-privacy, European-style toilet cubicles at an affordable price. The system comes standard with an array of privacy features, including 72-inch-tall, half-inch-thick compact grade laminate (CGL) doors and panels with nine-inch floor clearance; an occupancy indicator latch; a self-closing door; and a patented, spring-loaded, height-adjustable pedestal. Suitable for high-moisture environments like locker rooms.

**BOBRICK** | CIRCLE NO. 856

**58 | INTEGRATED PRIVACY SYSTEM** EDITORS' PICK

This restroom partition system for metal partitions features a patent-pending design with built-in privacy components that fully close the gap on the latch and hinge side of the door, providing zero sightlines into the stall. The built-in design eliminates the need for field retrofitting. Occupancy indicator latch comes standard.
